

TILVÍSANIR

We bought our EBK house in year 2005. Lyngholm house, located in Grímsnes in south part of Iceland. At first it was a carpenter who introduced us to EBK sommerhouses. We were at a party and met these carpenter which we new. We asked him about what kind of sommerhouse we should have. He told us that he had sommerhouse from EBK and he recommended them highly.

At the beginning we went to „Open house“ weekend where we did meet a EBK employee with all information. We also visited other people who had bought EBK sommerhouses. One couple is still a very good friends of us and we meet them 2-3 times a year.

We bought our EBK house without any work. We did it ourselves with a good help. We went to Köbenhavn to choose everything inside the house, a very nice weekend in Köbenhavn. From a-z the service and quality from EBK have been excellent!

We really love our EBK house and we try to stay there almost every weekend over wintertime and also for weeks over summertime. Greetings from Iceland.

Elias Bjarni Gudmundsson & Sigrídur Margrét Thorfinnsdóttir

We contacted EBK in the year 2007 when the Icelandic krona was very strong against the Danish krona. We were lucky to buy the house in that year because in 2008 the Icelandic banks collapsed as well as the Icelandic krona.

We bought "Sort Søholm 125" unpainted. Painting was something we could do easily. We enjoyed to paint it in our color "mountain blue" as we call it.

The contractors from EBK were only 4 weeks to build the house and it was incredible to watch them work long hours day by day. We are very proud of our EBK house today and we have been there at Christmas, Easter and of course in the summer.

Mvh, Sturla

It is only easy to recommend a buy of an EBK house. Probably one of the best and the most enlightening decision I have ever made.

An unique house after some small changes to fully fit my needs. Danish architecture at its best. Excellent handicraft/work from the beginning to the end.

EBK has been more than trustworthy all the time and every small item exceeded my expectations.

*Med god hilsen,
Kjartan Magnússon*

We built Sört Söholm 76 sqm beautiful house in 2008 right after the economic crisis in Iceland. The house is located in southern part of Iceland close to Laugarvatn. We had very good carpenters from Danmark who finished the house in only 5 weeks.

We love the design and lay out. It has so good connection with the surroundings thanks to the marvellous big windows. We spend as much time in the house as possible and always very satisfied.

We selected the EBK house because we liked so much the architecture.

*Sincerely
Gunnar Valtýsson & Solveig Thorsteinsdóttir, Iceland*

We have a beautiful house from EBK that were built in 2007. We started to look in too different houses year before. We did contact you and visit you in Denmark and decided to ask you to build our house.

Every think went very quick and well and 1 year later, to big container and to very skilled carpenters arrived at the building

side. The builders were 3 weeks building the house and it was unbelievable to see it go so fast.

We are very happy with our house, it is very warm and cosy and everything is still ok.

Best regards

Kristin I Gunnarsdottir, Reykjavik

We got a house from EBK in the year 2007 around 104 square metre size, we are very pleased with the house.

It fits very well in the surroundings as seen on the picture, where it is situated among small trees, small lakes and lava hills. The sunset in the valley is breathtaking and it can be seen through the house. Sitting by the sittingroom you can see both to the southeast, south, southwest and straight to north.

It can be cold in the northern part of Iceland in the winter time, the house is very well insulated and the heating cost is very low. Strong, good and beautiful house.

Best regards

Jafet /Hildur Hermóðsdóttir
